Design Skills

UX Design, Data Driven Design, Design System Management, Design Ops, Figma Prototyping, Figma Plugin Development, Micro-Animation, User research, Web Accessibility, Usability

Tech Skills

Data Analytics, Web API, DevOps, Frontend Development, Automated Testing

Programming Languages/Frameworks

C#, Typescript, JavaScript, HTML, CSS, ASP.NET, ADO.NET, MVC, WebAPI, WCF, SQL, DB2

Experience

Cvent, Senior Product Designer, Jul 21 – Current

Strategic Meetings Management Workflow Automation

UX | Research | JTBD | Data Analytics | Automation | Workflow

<https://www.cvent.com/en/event-marketing-management/meetings-management>

Leading the end-to-end SMM workflow automation of collecting an event info, managing the entire event and budget and finally generating insights from the reports. The project involves multiple full-fledged discovery and evaluative research, complex tech dependency evaluations and gigabytes of application data analysis.

Estimated increase in scalability: 10X

Estimated increase in logical filter capability: 20X

New platform adoption across clients: 100%

Have been leading this initiative in collaboration with a Senior User Researcher and Data Analytics team

Cvent App Marketplace

UX | Responsive & Adaptive Web Design | Upsell and Cross sell

<https://marketplace.cvent.com/en-US/listing?page=1>

Built the Cvent App Marketplace from scratch for upselling and cross selling numerous app integrations available across Cvent products designed for planner efficiency.

Led this initiative from scratch to the production within a challenging timeline and tech platform constraints.

Major highlight in the Cvent Connect 2022

Carina Design System

Atomic Design | Design System | Design Ops

<https://www.figma.com/customers/how-cvent-saves-up-to-40-minutes-daily-with-figma/>

India POC of the organisation design system team Carina. Contributed to the migration of old design system to the new tokenised, more flexible and scalable design system to expediate the design delivery to the sprint teams.

Have been researching the design and sprint teams' needs and accordingly building complex library components like tables and charts.

Figma Plugins

UX | Typescript | HTML | CSS

https://www.figma.com/@ayushkumar_in

Have been actively building Figma Design Plugins to automate the repetitive tasks and optimise design hand off to the dev teams. Examples:

Carina Inventory [Cvent internal] – lists out all library components and tokens to create a dev reference table and calculate the % Carina compliance of the designs

Carina Data Inventory [Cvent internal] – Populates the designs with Cvent specific mock data to test the scalability and relevance of the designs with actual data

Carina Theme Generator [Cvent internal] – Generates custom theme variables from provided set of colours which follow the Carina guidelines

Design Bud [Public] - Helps designers to automate and bulk perform some common actions like deleting hidden layers, detaching elements, replacing text with a sample value, reducing file size, generating project templates etc

Spell Based Plugins [Public] – A creative exploratory series to pick some spells from the Harry Potter Universe and build plugins which perform similar actions on your Figma files.

Design-Dev Collaboration

Cross team collaboration | Process Optimisation | UX Initiative

Working as a POC for all India based design teams and sprint teams to assist in design-dev conversations.

Initiated and have been leading the organisation level initiative of improving development sensitisation of designers and design sensitisation of developers.

IIT Delhi, M Des - Industrial Design, Aug 19 – Jun 21

Inclunav (now IwayPlus)

Usability | Accessibility | HTML | CSS3 | Neo4JS

<https://www.iwayplus.com/>

Designed the Application Platform experience and contributed to the frontend development of the scalable web application for annotation and navigation of indoor spaces.

Worked as the UX Designer and Frontend Developer in collaboration with AssisTech, IIT Delhi.

Smart Healthcare Solution

Healthcare | System Design | Accessibility

Built a smart healthcare system framework to facilitate seamless information transfer and informed wayfinding in healthcare spaces in collaboration with AssisTech, IITD and AIIMS, Delhi.

Worked as the UX Designer and Technology expert to ideate and evaluate feasible and viable solutions.

Task Management Portal

Design for usability | ASP/ADO.NET | MSSQL

Built a customised version of enterprise level timesheet and task management application to help the department do all TA management activities centrally.

Built it from scratch as a semester project.

Nagarro, Associate Lead, Feb 19 – Jul 19

Energy Management Platform

Energy | Agile Project Management | WebAPI

Migrated the complete service layers from WCF platform to RESTful WebAPI platform for entire energy management software solution.

Led the team of 3 developers for migration program.

Infosys, Technology Analyst, Feb 14 – Jan 19

Test Data Management System

Finance | Cloud | Data mining and profiling | Automation | Agile Project Management

Built the unified platform to facilitate data sanitisation and PII masking in non-production environments to make it centrally available across all applications built over varied technological platforms in the organisation.

Led the team of 5 developers to build the automatic self-service platform.

Next Generation Volume Licensing

Retail | Automation | SQL | WebAPI

Contributed to the database query building and API logic optimisation on the Volume Licensing Platform of the organisation.

Worked as an individual contributor.
